ABOUT US

We, PDCA International Ltd. have been operating as a service provider, offering a wide range of services in the arena of audit, verification, certification, calibration, and capacity building. PDCA strives to be in line with the Sustainable Development Goals (SDGs) by assuring a safe and sustainable work environment in terms of labor and human rights, biodiversity, circular economy, and standardized management systems.

PDCA International Ltd. is a SAC Approved Higg FEM Verifier Body (VB), SLCP Verifier Body (VB), an accredited certification body of ISO Management System Certification and Lead Auditor Training Courses. Apart from these, PDCA has a wide range of sustainability products to serve and be your wellbeing partner.

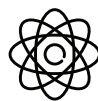

Mission

Our mission is to provide services to ensure conformity with quality & integrity. We provide our customers with confidence and innovative solutions to ensure their success in the global marketplace.

Vision

Our vision is to incorporate the world with a reliable, transparent, and sustainable business chain. We are focused to help, promote, and support businesses in enhancing their social, moral, and environmental performance.

Values

- Better service (Service with professionalism)
- Ethical (Providing service with manner)
- No compromise on quality (Zero compromise on quality)
- Integrity (Integrity is our pride).
- Meticulous and tardy (Service will be provided as scheduled)
- Environment & Health Safety (We help to create a culture of safety and reduce the likelihood of accidents or injuries in the workplace or other environments)

Higg FEM Verification

PDCA International Ltd. is a SAC Approved Higg FEM Verifier Body (VB) to conduct Verification at your facility.

As a SAC-approved Higg FEM Verifier Body, we have undergone rigorous training and demonstrated our expertise in conducting Higg FEM assessments. Our team of experienced verifiers will work closely with companies to ensure accurate and reliable assessments, helping them to achieve their sustainability goals.

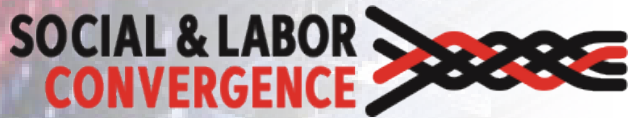

By partnering with us, companies can benefit from our extensive knowledge of sustainability best practices, as well as our commitment to quality and accuracy. Our Higg FEM assessments provide a comprehensive picture of a company's sustainability performance, giving them the insights, they need to make informed decisions and drive continuous improvement.

Higg FEM Training

PDCA International Ltd. is now a SAC Approved Higg FEM Trainer Body, to prepare yourself for the updates keep connected with PDCA.

The Higg Facility Environmental Module (Higg FEM) is a sustainability assessment tool to inform manufacturers, brands, and retailers about the environmental performance of their individual facilities, empowering them to scale sustainability improvements.

Social and Labour Convergence Program

The Social & Labor Convergence Program provides the tools to capture accurate data about working conditions in global supply chains. This multi-stakeholder initiative replaces the need for repetitive social audits by facilitating data sharing.

As a SLCP-approved Verifier Body, we have undergone rigorous training and demonstrated our expertise in conducting SLCP Verification. Our team of experienced verifiers will work closely with companies to ensure accurate and reliable verification, helping them to achieve their Social and Labour Standard.

COMMUNITY MEMBER

2023

PDCA International Ltd. is now a proud community member of GRI. PDCA is ready to accompany you on your journey of sustainable reporting.

The GRI Sustainability Reporting Standards (GRI Standards) help organizations increase their transparency and communicate their sustainability contributions and impacts. By better understanding, managing and disclosing impacts, organizations can unlock benefits that inform decisions, reduce risks, improve business opportunities and strengthen stakeholder relationships. This, in turn, enables companies to demonstrate their contributions towards environmental stewardship and societal wellbeing.

Management System Certifications

As a Management System Certification Body, our goal is to help organizations achieve excellence in their operations, management, and performance. We provide certification services for a range of management system standards.

Our certification services are recognized globally, providing organizations with a competitive edge in the market. Certification demonstrates an organization's commitment to quality, safety, and environmental responsibility, which can help to enhance brand reputation, attract new customers, and improve stakeholder confidence.

- ⊗ Weight & Weight Boxes Instruments Calibration
- ⊗ Force Instruments Calibration
- ⊗ Flow Instruments Calibration
- ⊗ Online Analyzer (pH, Conductivity & ORP) Instruments
- ⊗ Autoclave & Sterilization Tunnel Calibration & Validation
- ⊗ Electrical & Many more Instruments Calibration

Product Inspection

Prior to shipping products from factory and to proactively eliminate any quality issues in the production line, PDCA diligently provides tailored, dependable quality solutions to brands, retailers, and apparel manufacturers.

We provide following services:

- Initial Production Check (IPC)
- During Production Inspection (DUPRO)
- Final Random Inspection (FRI)

Initial Production Check (IPC)

The Initial Production Check (IPC) inspection, takes place from before production begins up until 20% has been completed.

IPC inspection, inspectors check the incoming quantity, quality, styles, and other details of raw materials, as well as production equipment, it ensures your production starts in the right place and identify quality issues early on in production.

During Production Inspection (DUPRO)

During Production Inspection (DUPRO), takes place from 20-80% of your production is completed and packed for shipping.

DUPRO Inspection ensures production is taking place properly, and whether factory is following your original specifications/Sample correctly or not. It's can confirm if, the production match with the shipment schedule.

Final Random Inspection (FRI)

Final Random Inspection (FRI) is performed when 100% production complete and at least 80% packed and 20% in packing.

Final Random Inspection (FRI) provides a final opportunity to look into the quality, conformity, compliance and other attributes of the products and to take corrective action before the product shipment.
